Dear FCC,
Please reject the NAB's petition 04-160.

XM Radio provides our family with variety and quality that we could certainly not find anywhere near where we live here in rural New Mexico.

We benefit greatly by our subscription to satellite radio.
It should not be up to the NAB to dictate exactly what we are permitted to hear.
After all, we pay for our satellite service..and love it!

Traffic and weather channels are very important to us since we travel to the bigger cities and need to get this information here in our remote area.

thank you for your attention.
